# WOOD'S CROP SPECIAL

Giving Timely Information and Prices of Seasonable Seeds

PUBLISHED BY T. W. WOOD & SONS SEEDSMEN RICHMOND VA.

## Wood's Treated Grains

Double Cleaned. 99% Pure. 90% Germination

In New Bags. We Hot Water Treat Our Foundation Seed of Wheat and Barley to Prevent Smut.

We are the largest Southern breeders and growers of small grain seed, growing 6,000 acres from the finest Registered or Certified stock. To avoid mixing in the drill or combine, only one variety of a crop is grown on any one farm. No crop is planted in a field where any other small grain was grown last season. All fields are carefully rogued. Crop Improvement Associations closely inspect our breeding and production fields.

### BEARDLESS WHEAT

**THORNE** is now the most popular wheat in Va., the Upper South and East. It made the highest yield of any wheat in the Va. High Elevation Experiment Station tests and yielded 48.3 bu. per acre in a Williamsburg, Va., test. It made highest yields in West Va., and 44.5 bu. per acre in a Penn. test. Tops at Clemson, S. C.

### NURED SMOOTH WHEAT

An improved strain of Forward; same stiff straw, long full heads and big, plump grains, but more smut and rust resistant, higher yield and is replacing it. Highest in Penn. tests 6 years. At the top in Tenn. and Va. tests 4 years. Made a record of 49.2 bu. acre at Williamsburg. Earlier, shorter, more rust resistant than Vahart.

### CHANCELLOR SMOOTH WHEAT

A new high yielding Southern wheat, resisting both stem and leaf rust, with fair mildew resistance, strong straw, early maturing and more winter hardy than Atlas and other rust resisting wheats, outyielding them for two years in mountain tests in Va. and N. C. Recommended in N. C., S. C., and Ga.

### VAHART SMOOTH WHEAT

Va. recommends it for its long record of high yields, stiff straw, and resistance to mildew, cold and loose smut. A selection from Redhart made at V. P. I. it averaged 11.4 bu. per acre more at the Williamsburg experiment station, has taller, stronger straw, larger, plumper heads, more winter resistance and later maturity. Most Vahart is mixed. Ours is carefully field rogued.

### REDHART SMOOTH WHEAT—Scarce

Earliest maturing wheat. Recommended in S. C., N. C., Piedmont and Coast and Western Ky. Short, strong straw. Resists storms and stem rust.

Wood's small grain breeding plots being inspected by G. V. Flowers, our chief plant breeder; Dr. T. R. Stanton, chief oat breeder for the U. S. D. A., our Bill Wood, and Ed. Shulkcum, in charge of Va. Experiment Station tests. We constantly improve all our small grain strains.

### LEAP'S PROLIFIC SMOOTH WHEAT

An old favorite variety that we introduced in 1907, still one of the most popular because of its long, beautiful, heavy heads, big plump grains and high yields. Recommended in Piedmont and Mountains Virginia and North. High yields in N. C. mountain tests. Resists cold, smut, stem rust and lodging. Made 43.1 bu. per acre at Pa. Expt. Sta.

### HARDIRED SMOOTH WHEAT

Recommended in S. C. and in N. C. Piedmont and Coast, where it made the highest average yield in 18 tests since 1944, making 46.5 bu. per acre in a 1948 test. Highest in North Ala. tests 3 years, making 47.3 bu. per acre in one test. Medium early. Resists rust and cold. Medium tall, stools profusely. Big heads. High milling quality.

### LEE COLD PROOF OATS

Recommended in Va., Md., Del. and N. J. Made highest average yield 11 years in Piedmont, Va., tests. Yielded 107.8 bu. per acre in a N. C. test and 6 1/4 tons of hay per acre. Best winter cat in N. J., Del., and for 3 years in Md. tests. Extreme winter resistance. Highest test weight grain. Tall, strong stalk.

**Calhoun Barley.** W. C. Johnson, King Wm. Co., Va., says: "I will plant no other small grain but Calhoun barley, as it is so much more profitable. It made 75 bu. per acre to 14 for wheat and 50 for oats. It has extra large heavy heads and big plump grain. It has medium short, very stiff straw. Sown 2 bu. per acre Dec. 23, it stood the winter and stoolled to a perfect stand. I cut it and sowed soybeans 2 weeks before wheat and oats ripened."

### FULGRAIN OATS

Earliest, shortest, stiffest straw and most popular recommended oat from N. C. and S. C. Coast and Piedmont to Miss. Ideal to combine. Tillers profusely. Matures before hot weather. Resists rust and smut. Long, full heads, well balanced and fruit heavily. Plump, heavy grain. High feeding value.

Wood's Fulgrain 3 oats for stock seed passed registered field inspection requirements with no variety or crop mixture weeds, or disease. Note the heavy yield of grain and stiff straw.

### VICTORGRAIN OATS

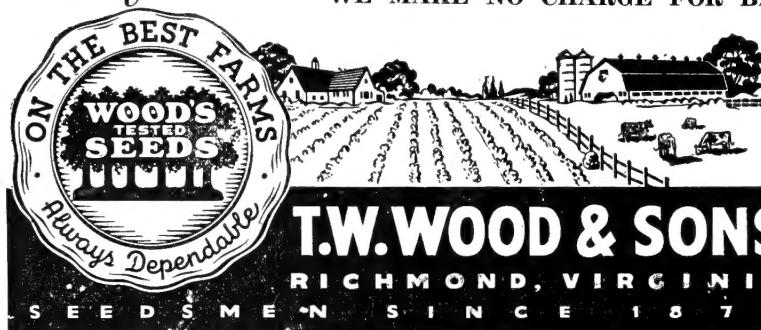

Inherits the good qualities of Fulgrain with greater rust resistance and yield. N. C. and S. C. recommend it for Coast and Piedmont. Made 108 bu. per acre at Edisto, S. C. Tillers profusely, stiff straw, easy to combine. Long heads. Bright, plump grain.

### LETORIA OATS

Has all good qualities of Lee but more rust and smut resistant. Recommended in N. C., Va., Piedmont and Coast, and Western, S. C. Outyielded all winter oats in West Va. in 1948. Resists storm and cold. Heavy grain.

### STANTON OATS

Recommended from Eastern Va. to Miss. Made a record 117.1 bu. per acre in a N. C. experiment station test and since 1945 the highest average yield in 20 tests, and the most hay in 18 tests, average 6,200 lbs. acre. Mid-season, mid-tall. Stiff straw. Winter hardy.

**WOOD'S SEEDS ARE TESTED**

And we know that they will grow before they are sent out. Even then they occasionally do not come up due to causes over which we have no control, such as covering too deeply or not deeply enough, too little or too much manure; cold weather, insects, or a crust through which the sprouts cannot penetrate, etc.; therefore T. W. Wood & Sons warrant, to the extent of the purchase price, that Seeds, Bulbs and Plants sold are as described on the container, within recognized tolerances. We give no other or further warranty, express or implied.

# **Important Information About LADINO CLOVER**

About Ladino Clover, we might call our customers' attention to the fact that there is quite a large crop of Ladino Clover being produced in the states east of the Mississippi River. We are not handling seed from these sections owing to the fact that in all of this territory regular White Dutch Clover grows naturally and it is our opinion that Ladino from these sections will contain quite a good deal of ordinary or white clover which comes up voluntarily. There is no way to detect the difference in the seed of White Dutch Clover and Ladino Clover.

The only Ladino Clover we are offering to our trade was grown in California and Oregon, which seed is produced on virgin land and white clover does not grow naturally in this territory. Consequently, our trade buying Ladino Clover from us can be sure of 100% pure Ladino. Seed produced in the areas east of the Mississippi is somewhat cheaper in price, but when figured on an acreage planting cost basis, the difference in price is exceedingly small and no doubt when your crop is produced the genuine Ladino Clover will show up to much better advantage and give more grazing and hay crop per acre.

The Affidavit Ladino Clover we are offering shows a purity well over 99% and over 90% germination, and in fact, in our opinion, is equal in every respect to Certified Seed. Our Certified Blue Tag Ladino carries official certification tag and is of the very highest quality. New crop Certified Ladino, however, will not be available until the latter part of September or early October, as it requires considerable time to get official tags through and sealed. Our customers can have every confidence in the Affidavit Seed we offer, giving equally as good results as Certified.

## **Regarding Alfalfa**

Information to hand is that the excessive rains throughout Oklahoma and Kansas will delay the seed crop considerably. From present prospects we will hardly have any new crop Oklahoma Alfalfa available until early September, and Kansas seed after the middle of September, which would be too late for our fall planting. We are fortunate in having some exceptionally fine quality last year's crop Oklahoma Approved and Kansas grown Alfalfa, both U. S. Verified origin, and premium quality, available for immediate shipment. We urge our customers to order their requirements early if they intend to plant Alfalfa this fall, as supplies of seed available for spot delivery are exceedingly short in the country today.

## **New Crop Crimson Clover**

For your information, the crop of Crimson Clover harvested in the producing areas of America this year, from best authorities, will only amount to 20% of that produced last year, and as a consequence domestic seed is bringing a very heavy premium over French grown imported seed.

The French grown seed was harvested under most ideal conditions and is beautiful, plump, bright quality, superior to domestic seed. Samples we have so far received are showing a purity of well over 99% and no German Moss whatsoever. We secured our supply of French grown seed from the very best cleaners in France and only purchased the very top quality. We have supplied Crimson Clover in the past from France and it has given equally as good results as domestic seed. We offer now crop Crimson Clover now for immediate and September shipment, at very attractive prices. We believe early purchases of Crimson Clover advisable, for with the shortage of seed available for planting this year, we anticipate a stronger to higher market with an early sell out of seed.

# WOOD'S HIGH GRADE GARDEN SEEDS

## GARDEN BEETS

Plant now for winter storage. 1 oz. will plant 50 ft. row, 6 to 8 lbs. one acre.

		Postpaid

# Wood's Grains

\*Certified orders accepted at 25c. bu. extra, subject to passing bin inspection, usually completed by Sept. We will ship as uncertified if certified tags do not arrive by shipping time.

## WOOD'S WINTER OATS

Sow 2 bu. per acre.	30-bu. Per bu., treated.	New 3-bu. bags.	lots. 32 lbs.
<b>*FULGRAIN</b>	<b>\$1.50</b>	<b>\$1.55</b>	
<b>*WOOD'S FULGRAIN 3..</b>	<b>1.65</b>	<b>1.70</b>	
Bred from the original Fulgrain ten years thru severe Va. winters. It is far more vigorous and heavy yielding than Fulgrain strains which were crossed on Victoria. Top yield in 1949 Pee Dee, S. C. test, 15.1 bu. acre more than Fulgrain 1949 B. F. S. Resists cold smut and the dread Victoria blight, which can wipe out other Fulgrain.			
<b>FORKEDDEER</b>	<b>\$2.10</b>	<b>\$2.15</b>	
<b>*LEE COLD PROOF</b>	<b>1.95</b>	<b>2.00</b>

<b>*VICTORGRAIN</b>	<b>1.55</b>	<b>1.60</b>	
<b>*LETORIA</b>	<b>1.70</b>	<b>1.75</b>	
<b>WINTER TURF, onion free</b>	<b>2.10</b>	<b>2.15</b>	

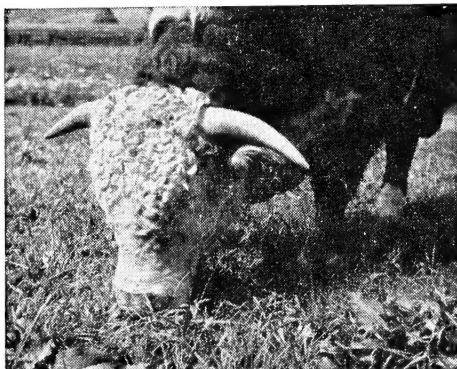

Renowned as the most winter resistant, dependable oat. Heaviest bright, beautiful seed.

## Wood's Hay Grain Mixture

Makes a heavy yield of palatable, nutritious hay, easy to cure and relished by all livestock. Excellent nurse crop seeding permanent hay or pasture as it comes off early. Contains Winter Oats, Smooth Wheat, Beardless Barley, Hairy Vetch, Austrian Winter Peas and Crimson Clover. Sow 100 lbs. acre. Price, \$10.00 cwt.; \$9.75 in 5-bag lots.

## Wood's Grain Pasture Mixt.

Furnishes more grazing in less time and at less cost than any other fall crop. The grains are balanced with legumes to supply protein for growth and warmth during the winter. Reduces grain requirements. Saves labor in feeding. Returns greater profits. Includes ingredients for continuous grazing throughout fall, winter and spring; highly recommended and used by leading farmers in the South. Contains ideal proportions of Hairy Vetch, Austrian Winter Peas, Crimson Clover, Rape, Abruzzi Rye, Winter Barley, Winter Oats and Smooth Wheat. Sow 100 lbs. per acre. Price, \$10.00 per 100-lb. bag; \$9.75 in 5-bag lots.

Wood's Grain Pasture Mixture is relished by all livestock. It keeps more animals per acre in good healthy condition during winter when permanent pastures are short. Ideal to supplement permanent pastures and give them a chance to recover from close grazing. It is becoming increasingly popular for poultry and hogs as it contains rape properly balanced with grain so it cannot cause bloating. Pasture is the most economical feed for all livestock.

## BEARDLESS WHEAT

Plant 1½ bu. acre.	20-bu., Per bu., 2-bu. bags. Treated.	lots. 60 lbs.
<b>*THORNE</b>	<b>\$3.35</b>	<b>\$3.45</b>
Has outyielded other wheats and has the highest recommendation by experiment stations in the Upper South and East, where it is replacing other wheats. It is more smut, mosaic and winter resistant, stands up better and combines easier. Has large heads, big, plump grain, high milling quality.		

<b>*NURED</b>	<b>\$3.35</b>	<b>\$3.45</b>
---------------	---------------	---------------

<b>*LEAP'S PROLIFIC</b>	<b>3.35</b>	<b>3.45</b>
-------------------------	-------------	-------------

<b>FORWARD</b>	<b>3.35</b>	<b>3.45</b>
----------------	-------------	-------------

Most Forward became badly smut infected. We hot water treated all our stock seed to eliminate smut.

<b>*CHANCELLOR</b>	<b>\$3.45</b>	<b>\$3.55</b>
--------------------	---------------	---------------

<b>*VAHART</b>	<b>3.45</b>	<b>3.55</b>
----------------	-------------	-------------

<b>REDHART</b>	<b>3.45</b>	<b>3.55</b>
----------------	-------------	-------------

<b>HARDIRED</b>	<b>3.35</b>	<b>3.45</b>
-----------------	-------------	-------------

## Bearded Wheat

20-bu. Per bu., lots. 60 lbs.

Before the days of the combine bearded wheats were frowned on. Beards are no longer objectionable and farmers are getting over their prejudice. Many feel that bearded wheats can be depended on every year, while smooth wheats may make a bumper crop one year and fall down the next.

<b>V. P. I. 131</b>	<b>\$3.35</b>	<b>\$3.45</b>
---------------------	---------------	---------------

<b>FULCASTER</b>	<b>3.35</b>	<b>3.45</b>
------------------	-------------	-------------

<b>STONER</b>	<b>3.35</b>	<b>3.45</b>
---------------	-------------	-------------

<b>*NITTANY (Penn 44)</b>	<b>3.45</b>	<b>3.55</b>
---------------------------	-------------	-------------

The highest yielding bearded wheat. Like V. P. I. 131, it is an improved strain of Fulcaster, but is more resistant to smut, mildew, cold, storm and milling quality and has outyielded V. P. I. 131. Thorne and Vahart in experiment station tests in Piedmont and Coastal Va., and N. C. It is becoming more popular every year. V. P. I. is now recommending Nitany in place of V. P. I. 131 in Piedmont and Coastal Va.

## WOOD'S SEED BARLEY

Treated. 2-bu. bags. 20-bu. Per bu., Sow 2 bu. per acre lots. 48 lbs.

<b>BEARDLESS (Scarce)</b>	<b>\$2.55</b>	<b>\$2.65</b>
---------------------------	---------------	---------------

<b>WONG</b>	<b>2.00</b>	<b>2.10</b>
-------------	-------------	-------------

<b>*WONG, grown from hot water treated seed</b>	<b>2.40</b>	<b>2.50</b>
---	-------------	-------------

This year most fields of Wong Barley lost a fourth from smut or blasted heads. Our hot water treated strain passed the certified field inspection, showing almost no smut.

<b>CALHOON</b>	<b>\$2.40</b>	<b>\$2.50</b>
----------------	---------------	---------------

A new beardless barley, high in feeding value, that should become the most popular small grain in the Southeast. It is recommended in S. C., N. C., and Va. It looks like Wong without its stubby beards, is more rust and mildew resistant, has stiffer straw, ideal to combine. Made 87.6 bu. per acre in a Va. test. At the N. C. experiment stations it made the highest yield, 24.4 bu. more than Wong, 90 bu. per acre in one test. Tops at Clemson, S. C., and in Ala. tests 3 years.

## Wood's Seed Abruzzi Rye

New 2-bu. bags. 20-bu. Per bu., Sow 11 bu. per acre lots. 56 lbs.

<b>ABRUZZI RYE (Scarce)</b>	<b>\$3.35</b>	<b>\$3.45</b>
-----------------------------	---------------	---------------

<b>*ABRUZZI, Onion Free</b>	<b>3.50</b>	<b>3.60</b>
-----------------------------	-------------	-------------

Passed certified field inspection.

<b>WINTER RYE</b>	<b>2.85</b>	<b>2.95</b>
-------------------	-------------	-------------

We are recognized foundation growers of Abruzzi Rye. For years we have bred for quick fall and heavy winter growth and grain yields. This insures earlier fall and more winter pasture or cover. Our strain yielded a record of 54.6 bu. of grain per acre at Clemson, S. C. We clean Rye on machinery devoted exclusively to Abruzzi.

It resists insects and disease, thrives on lighter land, with less fertilizer, can be sown over a longer period, is more winter hardy and gives more winter pasture than other small grains.
